SUMMARY

- Identification of the issues
- Demarche
 - Modelisation LF2L
 - Current functional spaces
- Work on progress

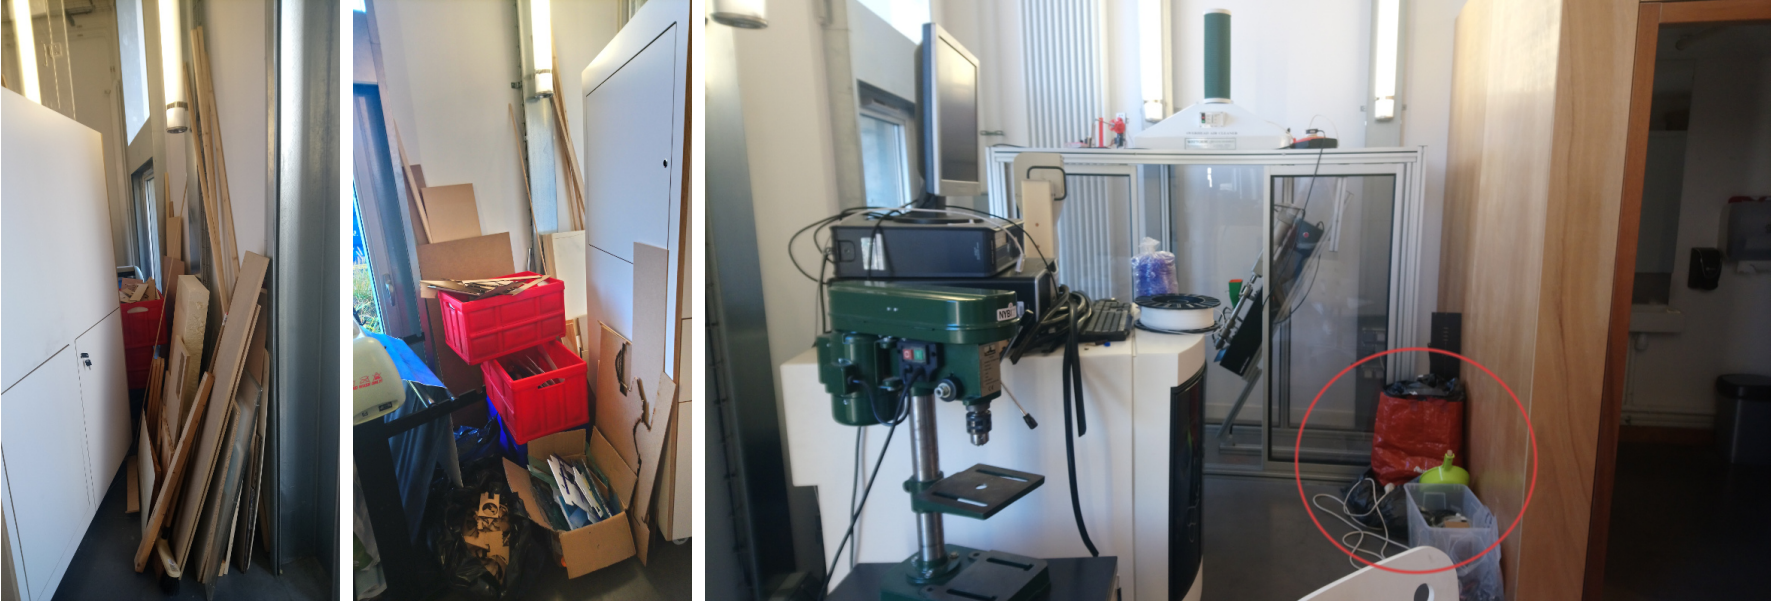

ISSUES AT LF2L

ISSUE 1 - STOCK MATERIAL

- Some of the spaces to store the material are not good used enough.
- Some of the spaces of the 3D printer's furniture are not used. There is no a clear rule about what this espace is intended for.

ISSUE 2 - STOCK WASTES

- The wastes of the laser-cut/3D printing process are not well organized
- No placement for the materials related to the extrusion process.

ISSUE 3 - TOOLS ORGANISATION

- There is no clear localization of the tools inside the toolbox

ISSUE 4 - LACK OF CERTAINS SPACES

Certain spaces are not used by users. however, there is a lack of:

- Electronic workshop.
- Mechanical workshop
- Space for projects in development phase
- Gallery for Finished Projects

DEMARCHE

DEMARCHE TO RESOLVE THE ISSUES

1. Modelisation LF2L
2. Identifications of current functional spaces
3. Propositions of solutions
 - New functional spaces
 - Furnishing
 - Distribution of the space
 - Components / Materials to buy
4. Visualization of the solutions
5. Definition of Resources: Cost and time
